

22 INSTANT WEB
HOSTING ADVANTAGES
BY SWITCHING ONTO
BELUGA EDGE
MANAGED WP FROM
OTHER MANAGED
WP VENDORS.

Managed WP with Beluga Edge Container-Based Hosting:

- 1 Manage only your Wordpress. No need to hassle over cPanel and hosting management.
- 2 Snapshots are available so you don't have to worry about backing up files to restore, get instant roll-back.
- 3 Easy provisioning of staging sites for making changes or updates to prevent errors.
- 4 Blueprints are available so you simply setup once and then apply quickly to all the sites in seconds.
- 5 Clone a website instantly.
- 6 Security is already built-in, by default including malware scanners, WAF, DDOS and many more.
- 7 Dedicated resources for your websites, nothing is shared, we give the best to our paying customers.
- 8 Optimal performance and bandwidth is guaranteed on all edges.
- 9 Enable 100% Cloud-based Auto Healing. Instantly move a website to another availability zone.
- 10 Autoscale dedicated resources automatically ensures high performance at low cost guaranteed.
- 11 Website security is our responsibility, your website will be malware-free from intrusions and hacks.

Managed WP in Shared Hosting Infrastructure:

- Typically includes cPanel hosting with automatic WP installation but you need to manage cPanel.
- Snapshots are not available but offer standard website backups that require time to restore.
- You have no staging site environment, so when errors happen, its forever indexed on the internet.
- You cannot globally work across all sites. Changes will need to be rinsed and repeated.
- Cloning is not supported but you get standard website backups that restore the latest safe copy.
- Security is an add-on that usually costs per feature but you get a malware scanner for monitoring.
- Your single server is split between multiple websites. You share resources with all the other websites.
- You will be capped on performance based on traffic to the website, so more site visitors means more costs.
- Your on a server based infrastructure so Cloud based option is not possible.
- Autoscaling is not supported.
- Hack-free is not possible but offer you to rollback to the last safe backup of your website. That's likely a copy of your site from last year.

Managed WP with Beluga Edge Container-Based Hosting:

12 Dedicated resources at the edge makes blacklisted none of your business concerns.

13 100% Uptime guaranteed. It's good to be on the edge.

14 One account manages all websites, so stop searching, sharing and memorizing FTP credentials ever again.

15 Define sites based on your customers or clients. Great for agencies or web professionals

16 High availability allows you to run multiple copies of your websites on different origins.

17 Design using Snapshots for version control and apply it globally to all your sites or customers.

18 Agencies and web professionals can share live designs with customers on staging environments.

19 Get access to A/B testing on live production sites to propose new website updates for customers.

20 Deploy your sites to the closest location to your customer base with our high number of origin locations.

21 Multi-region & Multi-origin deployment available. Suitable for higher availability and performance.

22 Global SecureDNS provides low domain resolution 22 time and resilience to all kinds of attacks.

Managed WP in Shared Hosting Infrastructure:

Typically includes cPanel hosting with automatic WP installation but you need to manage cPanel.

99% uptime is guaranteed most of the time. Websites on shared hosting aren't dependable.

Central management is not possible so you need to manage all sites seperately.

Customer management is not supported. You need manually handle all customers' and websites assets.

Multiple copies from different origins are not supported. You have only 1 origin.

You need to operate manually to copy the entire site, set versioning yourself & install every site instance.

You need to buy another hosting space to share changes & then copy all changes to original installation yourself.

A/B testing is not available. You could do fully manual installation, configuration and deployment every time.

Limited origin location support. Moving to different origin is possible via a lengthy support ticket queue..

Multi-region, AZ, Multi-origin is not supported.

Global SecureDNS is an extra cost, usually \$2.99 per month.
