31 INSTANT WEB HOSTING ADVANTAGES BY SWITCHING ONTO **BELUGA EDGE** MANAGED WP FROM CPANEL SHARED HOSTING

✓

Managed WP with Beluga Edge Container-Based Hosting:

✕

cPanel Shared Hosting:

1 Manage only your Wordpress. No need to hassle over cPanel and hosting management.

You need to spend time to setup and continuously maintain your cPanel console's huge learning curve.

2 The latest and most optimized installation of Wordpress comes pre-installed to start right away.

You need to install Wordpress yourself or hire a 3rd party for installation.

3 Auto backup is enabled on by default and you get unlimited backups at no additional costs.

You need to pay for a 3rd party for backup solution 3 that will usually cost an extra $3 per month.

4 WP and Plugins always stay up to date, as well on necessary server components (php, nginx, db).

You need manual WP and Plugins updates on a regularly basis for compatibility and security.

5 WP DB always stays clean and optimized on the edge for the best site health and performance.

You need to carefully optimize your DB for 5 performance or hire a 3rd party for DB hygiene.

6 CDN is automatically pre-installed onto any of your websites and apps to start with the edge.

You need to setup either server based caching or 6 CDN yourself, usually an extra cost $3 a month.

7 Snapshots are available so you don't have to worry about backing up files to restore, get instant roll-back.

You work only on the current live copy with no backup time machine nor staging sites.

8 Easy provisioning of staging sites for making changes or updates to prevent errors.

You have no staging site environment, so when errors happen, its forever indexed on the internet.

9 Blueprints are available so you simply setup once and then apply quickly to all the sites in seconds.

You cannot globally work across all sites. Changes will need to be rinsed and repeated.

10 Clone a website instantly.

You have no cloning available, every site is a new adventure, good luck.

11 Security is already built-in, by default including malware scanners, WAF, DDOS and many more.

You need to setup at least a firewall and malware 11 scanners that will usually cost an extra $9 per month.

cPanel Shared Hosting:

12 Dedicated resources for your websites, nothing isshared, we give the best to our paying customers.

Your single server is split between multiple websites. You share resources with all the other websites.

13 Optimal performance and bandwidth is guaranteed on all edges.

You will be capped on performance based on traffic to the website, so more site visitors means more costs.

14 All Plugins and installation in use are best optimized and configured to ensure the top WP performance.

You need to learn, configure and deploy any optimizations to your WP instance(s).

15 Website security is our responsibility, your website will be malware-free from intrusions and hacks.

In the event of a hack or breach, you need to hire a hack remediation service, its usually an extra cost of $30+.

16 Dedicated resources at the edge makes blacklisted none of your business concerns

Hello, bad neighbor effect. If any site on the shared server resources contains malicious content, your site(s) can be banned & blacklisted.

17 100% Uptime guaranteed.
It's good to be on the edge.

Websites on shared hosting aren't dependable. A lot of resources are dedicated to server services.

18 One account manages all websites, so stop searching, sharing and memorizing FTP credentials ever again.

You need to implement that yourself since there is no central management for your website.

19 Define sites based on your customers or clients. Great for agencies or web professionals.

You need manually handle all customers' and websites based on file managers and folders.

20 Enable 100% Cloud-based Auto Healing. Instantly move a website to another availability zone.

You may have server maintenance or network problems even collocation issues like electrical fires or echos...

21 Autoscale dedicated resources automatically ensures high performance at low cost guaranteed.

Your site's shared hosting performance will drop if you have more visitor traffic.

22 High availability allows you to run multiple copies of your websites on different origins.

You get access to one origin over your shared resources.

cPanel Shared Hosting:

23 Design using Snapshots for version control and apply it globally to all your sites or customers.

You need to operate manually to copy the entire site, set versioning yourself & install every site instance.

24 Agencies and web professionals can share live designs with customers on staging enviroments.

You need to buy another hosting space to share changes & then copy all changes to original installation yourself.

25 Get access to A/B testing on live production sites to propose new website updates for customers.

A/B testing is not available. You could do fully manual installation, configuration and deployment every time.

26 Get the best performance from the edge with granular tweaking and fine-tuning settings.

You need to become a WP expert or get a costly service ($) to apply fine tuning for your sites.

27 Rank higher in SEO from faster page load times, thanks to edge nodes and built-in CDN.

You need to setup server site caching and the CDN yourself with no improvement to performance guarantee.

28 Browse through the best in class section of trusted plugins and themes for Wordpress sites.

You are responsible to use trusted plugins, inspect nonvulnerable versions and apply updates yourself.

29 Deploy your sites to the closest location to your customer base with our high number of origin locations.

Moving from US-East to US-West? You need to cancel the account to get a new hosting account to migrate.

30 Multi-region & Multi-origin deployment available. Suitable for higher availability and performance.

Multi-origin is not supported.

31 Global SecureDNS provides low domain resolution time and resilience to all kinds of attacks.

Good luck changing your DNS. This is bound with your hosting server itself, open to any kind of attacks.

The choice is yours!
